

Keyboards So Rugged...

People Can't Wait to Get Their Hands on Them

Washable, sealed, chemical resistant PC products designed for Industrial environmental conditions

Yes, they're cool, but they're also tough enough to be cleaned with a variety of chemical disinfectants. With a non-porous, IP68 silicone rubber construction, the Cool PC accessories are built to withstand water and dirt that would render other keyboards and mice useless.

The Cool keyboards feature a superior ergonomic design with outstanding tactile feedback. Manufactured to the highest standards, our "good to the touch" keyboards are a pleasure to use. With no cracks, crevices or seams, contaminants have no place to hide and residue or particulates cannot cause damage. The result: cleaner keyboards a safer, more efficient, more productive workplace

These Cool keyboards and mice are ideal for factory, laboratories or field environments. Our innovative,

high-endurance line of PC accessories provides genuine relief from the high cost of continuous replacement of equipment necessitated by the damage moisture and contaminants can cause.

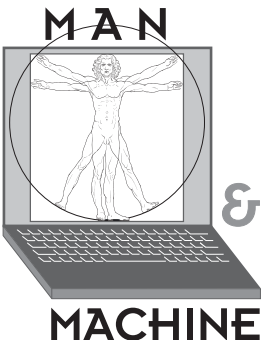

Now, how Cool is that?

Cool Enhancements Available:

- Silk Touch™ coating
