

NEW ENHANCEMENTS FOR GREATER EASE, USE & VALUE

Keyboards So Clean...

People Can't Wait to Get Their Hands on Them

Disinfectable, water-resistant, chemical-resistant PC products designed to enhance patient safety and infection control in medical environment

Yes, they're cool, but they're also tough enough to be cleaned with alcohol, 10% bleach solutions, and other chemical disinfectants. With a non-porous 100% latex-free silicone rubber construction, these "Cool" PC accessories are built to withstand disinfection that would render other keyboards and mice useless. Bacteria and viruses are minimized. Transfer of harmful microbes is diminished. Healthy environments become healthier.

These "Cool" keyboards feature a superior ergonomic design with outstanding tactile feedback. Manufactured to the highest standards, our good-to-the-touch keyboards are a pleasure to use. With no cracks, crevices or seams—microorganisms have no place to hide and grow. The result: cleaner keyboards and healthier environments.

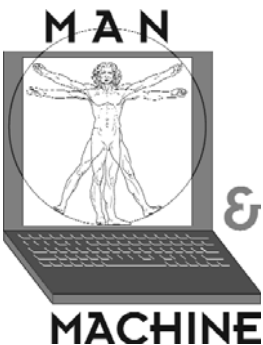

Cool keyboards and mice are ideal for operating rooms, emergency rooms, nursing stations, medical carts, patient rooms, laboratories and anywhere infection control and cleanliness are crucial. Our innovative line of PC accessories provides genuine relief from the high cost of infections and cross contamination. Infection control is finally at your fingertips. Now, how cool is that?
